Professional Summary

Quality-focused Software Engineer with **3+ years of experience** in embedded system validation, hardware testing, and configuration management within IoT and Smart Metering platforms. Hands-on exposure to **CAN Protocol (CAN 2.0A/B, CAN FD)**, **Automotive Infotainment systems**, and **Python scripting** for test automation. Experienced in functional, regression, integration, and system testing with strong defect lifecycle management using **IBM ALM** and **JIRA** in Agile environments. Eager to leverage automotive embedded systems knowledge in an **Infotainment Testing** role.

Technical Skills

Infotainment & Automotive Domains: Automotive Infotainment Architecture (Audio, Bluetooth, WiFi, Projection, Camera), HMI, Connectivity Systems, Automotive Software Stack

Protocols: CAN 2.0A/B, CAN FD, UDS (ISO 14229) Basics, ECU Communication, Vehicle Network Architecture

Testing Types: Manual Testing, Functional Testing, Regression Testing, Integration Testing, System Testing, Hardware Testing, PCB Validation, Flashing & Calibration Testing, Thermal Chamber Testing, High/Low Voltage Testing

Tools: IBM ALM, JIRA, Vector CANoe (Exposure), Python (Scripting & Automation)

Methodologies: Agile, SDLC, Requirement Traceability, Quality Gate Compliance, Configuration Management, Defect Lifecycle Management

Languages: Python, C

Professional Experience

Bosch Global Software Technologies (BGSW)

Bengaluru, India

Software Engineer – Configuration Management

Feb 2024 – Present

- Managed end-to-end configuration management and release validation for large-scale **Smart Metering** and **IoT-based embedded platforms**, ensuring version control, baselining, and audit readiness.
- Maintained requirement, design, code, and test case **traceability using IBM ALM**, supporting Quality Gate (QG) compliance for Cloud-Nexus platform releases.
- Developed **Python-based automated scripts** for configuration audit checks, improving traceability efficiency and reducing manual effort across validation workflows.
- Implemented workflow automation for deployment pipelines, achieving a **40% reduction in deployment time** and contributing to a **50% decrease in production incidents** through strengthened release governance.
- Coordinated cross-functional task allocation and progress tracking across hardware, firmware, and software teams in an **Agile** environment.
- Participated in **ISTQB Foundation Level** training and examination, strengthening core software testing knowledge and QA practices.

Bosch Global Software Technologies (BGSW)

Bengaluru, India

Associate Software Engineer

Apr 2023 – Jan 2024

- Designed and executed **functional, regression, integration, and system test cases** for embedded Smart Metering hardware and software modules, ensuring release readiness.
- Performed **PCB validation** including flashing & calibration testing, thermal chamber testing, and high/low voltage testing to validate operational stability of embedded hardware.
- Managed complete **defect lifecycle** using IBM ALM and JIRA — from logging and root cause analysis to resolution tracking and closure in collaboration with development teams.
- Assisted in exploratory testing, **embedded hardware validation**, and technical documentation preparation for Smart Metering projects.
- Executed **embedded system validation** activities and contributed to test documentation including test plans, test cases, and validation reports.

Bosch Global Software Technologies (BGSW)

Bengaluru, India

Software Engineer Trainee

Jan 2023 – Mar 2023

- Completed structured training on **SDLC and Embedded System Testing**, with hands-on development using **STM32 microcontroller boards** for automotive control simulations — including indicator control, buzzer validation, and hardware interfacing.

Key Projects

Smart Metering – DCU PCB Board Validation

Bosch BGSW

- Executed **high/low voltage testing and PCB validation** for Data Concentrator Unit boards; validated PCB assembly and hardware modifications ensuring compliance with embedded system standards.

Phantom TAQI Sensor – Thermal Validation

Bosch BGSW

- Conducted **thermal chamber testing and environmental validation** for IoT sensor modules; prepared detailed temperature validation documentation aligned with hardware test protocols.

Phantom Edge – Manual Hardware Testing & Defect Tracking

Bosch BGSW

- Conducted **manual hardware testing and validation**; developed comprehensive test cases and performed end-to-end **defect tracking** to ensure product quality and release readiness.

Vivary – Flashing & Calibration Testing

Bosch BGSW

- Executed **flashing and calibration testing** along with functional validation; prepared detailed defect reports supporting product sign-off and release validation.

Cloud-Nexus Platform – Release & Audit Support

Bosch BGSW

- Managed RTDC activities in **IBM ALM** supporting audit compliance; updated Quality Gate checklists and coordinated daily task tracking for the configuration management team.

AMI – Meter Maintenance, Rajasthan ENV

Bosch BGSW

- Managed **meter commissioning**, operational mode conversion, and **SLA reporting** processes for large-scale Advanced Metering Infrastructure (AMI) field deployments.

AMI – Configuration & IBM ALM Tool Management

Bosch BGSW

- Maintained end-to-end **Requirement, Test Case, Design, and Code traceability** in IBM ALM; led QG preparation, managed task assignment and tracking, and provided **audit support** for AMI platform releases.

Certifications

Introduction to Automotive Infotainment (IVI) for Beginners – Udemy

2026

- Automotive Infotainment Architecture, HMI, Connectivity Systems (Bluetooth, WiFi, Navigation), Automotive Software Stack

Master CAN Protocol Completely from Scratch (CAN + CAN FD) – Udemy

- CAN 2.0A/B, CAN FD Communication, ECU Networking, CAN Frame Structure, Error Handling, Vehicle Network Architecture

Manual & Automation Software Testing with Gen AI – Udemy

- Test Case Design, Functional Testing, Automation Concepts, AI-assisted Testing Frameworks

Education

REVA University

Bachelor of Technology – Electrical and Electronics Engineering

Bengaluru, India

Aug 2018 – Jun 2022
